- Container Yard Facility
- Port Facility Consultants

EVERYDAY IS A NEW DAY FOR US AND WE WORK REALLY HARD TO SATISFY OUR CUSTOMERS EVERYWHERE.

AREA OF OPERATIONS

MARINE SURVEY

Aim to provide comprehensive support for both large and small-scale marine projects.

Offer a wide range of marine and cargo surveying services 24/7.

Team consists of experienced professionals in the maritime industry, including former Master Mariners, Chief Officers, Chief Engineers, naval architects, and other experts.

Provide efficient marine consulting services to clients.

Specialize in various marine projects, such as risk assessment and management, superintendency services, project cargo services, warranty survey and load-out services, and more.

Diverse range of clients, including receivers, shippers, cargo owners, ship owners, insurers, charterers, P&I Clubs, and others.

Committed to delivering high-quality service to their clients.

Dedicated in-house team that supports their technical expertise.

LOSS ADJUSTING

Seeks tactical and technical evidence to provide clarity on incidents, ranging from minor damages to major catastrophic events.

Loss adjusting in the marine insurance industry involving on-site assessment of marine-related damage.

Provides high-quality services in the marine insurance sector.

In-house expertise to establish the cause, extent, and circumstances of damage.

Possess crucial understanding and knowledge of conditions in assessing marine damage.

Team of marine specialists at CHM Global ensures comprehensive coverage of all aspects.

Utilize highly trained experts, modern tools, and a global network to handle marine insurance cases.

Handles a wide range of marine-related damage, including damaged goods in containers and vessels as well as complex liability claims.

Services include circumstance investigations with extra diligence.

Focuses on providing undeniable clarity and accurate assessments in the marine insurance industry.

WORK BOATS

Workboats are well-equipped and designed to meet a range of needs in the maritime industry.

Specializes in providing easy-to-maneuvre workboats for various jobs and projects.

Workboats are versatile and can assist in tasks like ferrying crews between ships or from ships to the shore.

Also suitable for transporting machinery and materials between ships and shore.

Equipped to support diving teams during operations.

Team of experts will ensure smooth and secure operations prioritizing your safety throughout the operation.

Transportation services for materials and equipment, as well as support for diving operations and other marine-related tasks.

Trust our work boats to provide the necessary support for your specific project requirements.

DRI/HBI SPECIALIST

Approved by Qatar's governing bodies as specialists in DRI/HBI handling.

In-house capabilities and agreements with qualified individuals for technical support, remedial actions, and risk mitigation.

Specialize in handling hazardous DRI/HBI cargoes and have previous experience at the Qatar Steel facility.

Comprehensive services cover the entire process of DRI/HBI shipment handling, from start to finish.

Reputation for efficiency, flexibility, and deliverability while ensuring compliance with all required regulations and standards.

Services include loading supervision, quality inspections, safe storage, handling, and loading of DRI.

Provide Super Cargo attendance during the voyage of DRI/HBI shipments in compliance with IMO regulations.

Offers services such as issuance of Fitness certificates, Draft surveys, monitoring of cargo loading, and witnessing chemical composition.

Equipped with ultrasonic hatch testing kits, K-connector thermometer, UV thermometer, H2 gas meter, multi-gas meter, and other necessary tools.

OFFSHORE CHM-GOC (Global Offshore Consultants)

Specializes in marine assurance services.

Conduct vessel suitability surveys, condition surveys, and pre-purchase inspections to assess the fitness and condition of vessels before deployment or acquisition.

Performs marine warranty surveys (MWS) of jack-up rigs and self-propelled barges with reliability.

Master Mariners oversee towing and anchor handling inspections, ensuring compliance with industry guidelines.

Handles DP assurance, DP Gap Analysis, Dynamic Positioning (DP) annual surveys, Failure Modes and Effects Analysis (FMEA)

FMEA Proving trials to evaluate DP system functionality and reliability.

Offer commissioning and execution of OVID and Cargo bulk system condition surveys for offshore units.

Focuses on managing risks, meeting regulatory requirements, and following best practices.

Contributes to the safety, efficiency, and environmental sustainability of offshore operations.

SUBSEA SURVEYS

Team of experts specializes in performing comprehensive diving surveys.

Diving surveys for specialized inspections conducted in underwater environments help ensure safety and integrity of underwater assets and structures.

Thorough examination of underwater structures, such as the hull of vessels or fixed structures.

Identify any defects or issues present in the underwater structure.

Minor defect rectification performed during diving surveys.

Support for maintaining optimal conditions and continued use of underwater infrastructure.

Utilize high-resolution multibeam and side scan sonar data, shallow seismic, and magnetometer data to tailor a dataset that meets project requirements.

Generate data to understand the condition and makeup of the seabed, for installation, decommissioning, dredging, and conservation plans.

Use specialized equipment, including Ultra Short Baseline (USBL) and Long Baseline (LBL).

SNP

Engages in market analysis and trend discussions with ship owners, charterers, investors, and bankers.

Conducts market research to identify potential buyers or suitable sales candidates for clients.

Engages in negotiations with counterparties, discussing key aspects of the sale transaction based on standard contracts.

Negotiates the vessel's price and logistical details for the transfer of title and ownership to the buyers, including banking arrangements.

Efficiently manages minor disputes that may arise during negotiations, taking into account market fluctuations and maintaining the best interests of their clients.

ENVIRONMENTAL SURVEYS

Offers comprehensive marine environmental services that combine consultancy, ecological surveys, and laboratory testing.

Services focus on coastal, marine, and estuarine environments, supporting infrastructure planning, consenting, development, environmental protection, and resource management.

Integration of services within CHM Global enables cost savings throughout the project.

Actively cooperates with other stakeholders to ensure a positive project lifecycle experience for all parties involved.

Strives for excellence and continuously improves its services through innovation, incorporating new technological advances and challenging processes and ideas.

Dedicated specialists and ongoing research programs to manage challenging projects and provide expert advice.

Team possesses in-depth knowledge of diverse market sectors, including renewable energy, oil and gas, aggregates, ports and harbours, cables and pipelines, leisure, the public sector, and water industries.

Services integrate consultancy, surveys, and laboratory testing to provide a comprehensive approach.

Support clients in various aspects of project planning, consent, and development in marine environments.

Prioritize environmental protection and resource management while collaborating with stakeholders to ensure successful project outcomes.

CLAIM RECOVERIES

Consultancy and recovery services are tailored to meet the specific needs of clients in the maritime industry.

Services for various types of claims, including cargo claims, general average situations, collisions, damage to port infrastructures, anti-pollution costs, wreck removal costs, unpaid invoices in the bunkering and/or credit insurance industry, and demurrage claims.

Services are highly competitive, proactive, cost-conscious, and results-driven.

Possess a strong understanding of the P&I market and its different players, including International Group P&I Clubs, Fixed Premium Commercial Insurers, and Managing General Agencies.

Legal expertise in dealing with the securities and reactions of these players to recovery claims.

Provides comprehensive support in navigating complex claim situations and maximizing recovery opportunities.

YACHT PRACTICES

Specializes in quickly operationalizing yachts after an incident, assisting owners and insurers.

Team of highly qualified claims managers and surveyors brings extensive expertise in marine insurance and super yacht operations.

Excel in conducting Full Condition Surveys, Pre-Purchase Surveys, and Appraisal Surveys.

Provides services for maintaining boats to ensure seaworthiness, safety, and appearance.

Assists in regular maintenance to protect boats from the corrosive effects of saltwater, marine organisms, and UV rays.

Provide maintenance to preserve the boat's finish, structural integrity, and performance, and extends its overall lifespan.

YACHT AND VESSEL VALUATORS

Provide comprehensive marine valuation services based on industry standards and market analysis.

Independent marine valuer offering marine valuations and financial appraisals for yachts and vessels.

Valuation methodology follows the International Valuations Standard Council (IVSC) guidelines.

Valuation process includes assessing the overall condition of the vessel and conducting a detailed comparative analysis of similar vessels in the sales and purchase market.

Depreciation and operational costs are considered in the valuation assessment.

Can provide an estimation of the forced sale value of the vessel.

Well-established client base.

MARITIME – INTERNATIONAL LEGAL CONSULTANTS

Premium service provider and preferred business partner in maritime legal matters, offering prompt advice and comprehensive services.

Provides maritime legal consultancy to clients worldwide, including ship owners, operators, charterers, P&I clubs, and insurers.

Expertise lies in shipping and maritime laws in Qatar, offering practical and commercially sound advice.

Offers a wide range of regulatory, transactional, and dispute-related advice to its clients.

Strong reputation and are recognized by their clients.

Client base includes leading banks, insurance companies, corporate houses, holding companies, and financial institutions in Qatar.

PORTS AND TERMINALS

Provides reliable and cost-effective solutions to meet the needs of ports and terminals.

Offers a comprehensive range of services to ports and terminals worldwide.

Provide assistance with insurance matters, including property and liability coverage, to ensure asset and operation protection.

Inspection services for lifting gear to ensure compliance with safety standards and fitness for use.

Thorough risk assessment analyses are conducted by experts to identify potential hazards.

Appropriate risk management strategies to minimize accidents or incidents.

LIFTING GEAR INSPECTORS

Specializes in top-quality inspection and testing services for lifting and rigging gear.

Provide both on-site and workshop-based inspection services, minimizing disruption to your operations.

Team consists of highly trained inspection technicians who are LEEA-certified and equipped with the latest tools and equipment.

Offer comprehensive inspection services, including on-site inspections and proof load testing of lifting equipment.

Certifications such as Type Tests, Factory Tests, Initial Tests, Break Tests, Periodic Tests, and Load Tests also provided.

Ensures your equipment is thoroughly inspected and certified to meet safety standards.

CHEMISTS

Conducts surveys as per client's requirements to ensure a safe working environment on board vessels.

Gas-free surveys conducted for vessel tanks prior to any hot work.

Surveys for LNG and LPG ships carried out prior to inspections or any hot work.

Inspection and survey of IMDG goods conducted before and during loading to meet IMDG code parameters.

Ensure the safety of cargo and the personnel working by adhering to safety standards.

LNG GAS EXPERTS

Highly experienced team for LNG hazard analyses and probabilistic risk assessments.

Expertise LNG facilities and vessels, including liquefaction facilities, receiving terminals, storage plants, and FLNG.

Skilled professionals with experience in LPG vessel inspections in the GCC region.

Provides reliable support to clients in ensuring the safety and efficiency of LNG operations.

Deliver comprehensive assessments and inspections to meet the highest standards.

CHM CONTAINERS

Container yard facility provides a secure and convenient location for container storage.

Competitive rates are offered for both short-term and long-term contracts to accommodate different needs.

Facility includes repair and cleaning facilities to maintain containers in excellent condition.

Team of professionals ensures the safety and proper maintenance of containers in our care.

Ideal storage solution for short period or longer duration.

IMDG EXPERTS

Dangerous goods require surveys before shipping for clearance.

Surveyors inspect the goods and their labels, ensuring compliance with IMDG code.

Proper packaging for sea voyage verified according to IMDG code.

Accompaniment of a dangerous goods note and manifesto is ensured.

Surveyors document packaging and labelling conditions with notes and photographs as evidence.

CONTAINER INSPECTION

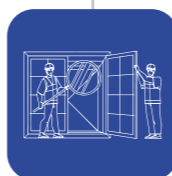

Provides comprehensive services to the container industry for safety, stability, and usability.

Services include certification for new construction and approval of modifications.

In-service inspections and verification of product information conducted.

Supervision of the loading process and ensuring packaging suitability.

Highly trained surveyors ensure containers are structurally sound and meet requirements for loading on ocean vessels.

SHIP MANAGERS - TECHNICAL

Offers scalable ship management services tailored to client needs.

In-house technical management and third-party managers ensure careful maintenance and operation of ships.

Compliance with regulatory parameters such as ISM Code, Flag State, Port State Control, and classification society rules.

Ship technical management provides advice, and updates on vessel operation, and closely monitors budget and expenditure.

Manages ship maintenance to ensure seaworthiness.

SHIP MANAGERS - CREWING

Ship managers maintain a comprehensive database of seafarers from various ranks and nationalities.

Collaborations with agents worldwide allow for prompt sourcing of candidates to meet the needs of the marine industry in Qatar and the GCC.

Facilitates training, certifications, and immigration procedures for seafarers both in Qatar and overseas.

Long-standing collaborations contribute to competitive rates for services.

Ensures efficient and reliable support for seafarer recruitment and related processes.

CHARTERING

Services are highly sought after in the market for their safe and timely delivery of consignments.

Strong connections with major vessel owners worldwide through a network of associates.

Team of experts coordinates with clients and operates according to their schedule, ensuring the safe dispatch of cargo.

Chartering service adds value to clients' consignments by carefully matching cargo with the most suitable vessels, estimating the voyage, and offering charters based on voyage, period, and C.O.A (Contract of Affreightment).

Provides comprehensive analysis of the full voyage results, further enhancing the service quality.

SHIP BROKERING

Serves as a mediator between ship owners, charterers, buyers, and sellers in arranging the movement of goods and ships.

Possesses extensive market intelligence and expertise to provide valuable advice to clients.

Vast network with surveyors, insurers, ship owners, and legal experts to conduct thorough due diligence and risk assessments for high-value transactions.

Acts as a trusted intermediary, leveraging its industry connections and knowledge to ensure smooth and informed negotiations.

Comprehensive services enable clients to make well-informed decisions and mitigate risks in ship chartering and ship buying/selling transactions.
