# Monthly Highlights – July Edition Moving Forward, Together

July marks another chapter of growth, commitment, and new opportunities. At CHM Global, we continue to strengthen our focus on quality, safety, and operational excellence while recognizing global events that inspire innovation, sustainability, and teamwork. Explore the key dates and observances that make July a meaningful month.

This month, Qatar bids farewell to His Highness the Father Amir, **Sheikh Hamad bin Khalifa Al Thani**, whose visionary leadership laid the foundation for the nation's remarkable transformation and global standing. CHM pays tribute to his extraordinary leadership and enduring legacy.

In this edition, we provide key updates across our Survey, Project, and Offshore divisions, highlighting critical operations, inspections, and ongoing projects. Explore the latest insights and accomplishments that reinforce our commitment to safety, quality, and operational excellence

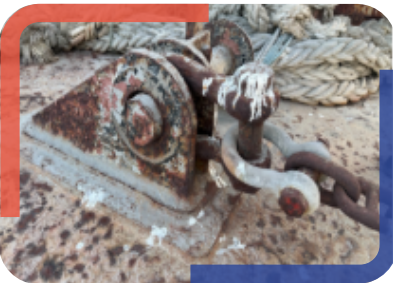

## SURVEY SPOTLIGHT

### Gas Free Inspection

Gas-free inspections are performed to verify that confined spaces onboard vessels are safe for entry and work. Using specialized gas detection equipment, our inspectors assess cargo holds, tanks, and enclosed compartments for hazardous atmospheres, including flammable, toxic, and oxygen-deficient gases. This process

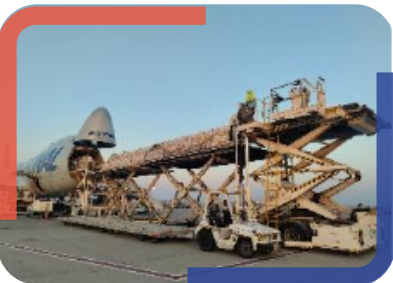

helps reduce operational risks, safeguard personnel, and ensure a safe environment before work commences.

### Towage Inspection

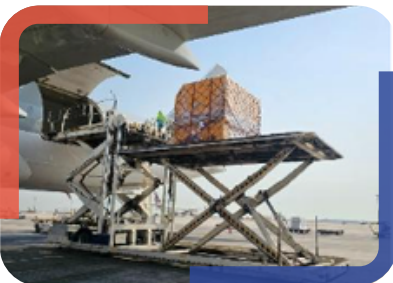

Towage operations rely on the safe and efficient performance of tugboats, barges, and their towing equipment. Our inspection services include a detailed examination of towing systems, winches, hooks, lines, and vessel condition to verify their operational readiness. By identifying defects, wear, or potential safety risks, we

help ensure reliable towage operations, regulatory compliance, and the protection of personnel and assets.

### Discharge Monitoring

Our experienced surveyors supervise cargo discharge operations to ensure safe handling, identify any signs of damage or shortages, and document observations with comprehensive survey reports. CHM Global is committed to delivering accurate, reliable, and timely survey services.

### Split engine export

Our experienced surveyors oversee the export of split engine components by verifying packing quality, cargo condition, and loading operations. Comprehensive inspection reports are provided to ensure compliance with shipping requirements and protect our clients' interests throughout the export process.

### Engine Export

Engine export operations require careful supervision to ensure safe handling, secure transportation, and compliance with export regulations. Our team monitors the loading, packaging, documentation, and logistics process to verify that each engine is shipped in accordance with industry standards. This helps minimize delays, protect the cargo from damage, and ensure a smooth export process from origin to destination.

### Loose Gear Inspection

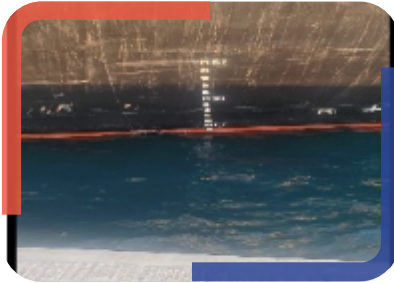

Loose gear inspections are carried out to verify the safety and serviceability of lifting accessories used in cargo handling operations. Our surveyors examine items such as hooks, shackles, slings, chains, and lifting beams for signs of wear, damage, corrosion, and compliance with applicable certification requirements. Detailed findings

and recommendations are provided to help maintain safe operations and ensure compliance with maritime safety standards.

### Cargo Damage

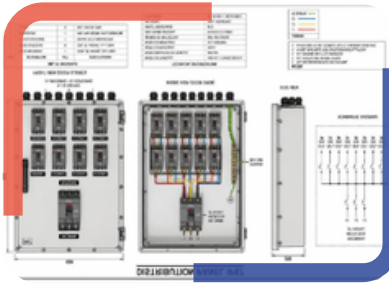

A survey was conducted on consignments of coffee and flour following reports of cargo damage. The inspection revealed torn packaging, moisture exposure, contamination, and product deterioration, indicating damage during handling, storage, or transit. A detailed survey report was prepared to document the findings and support the cargo claim process.

### Draft survey

A draft survey was carried out to accurately determine the quantity of cargo loaded or discharged by measuring the vessel's displacement before and after cargo operations. Our surveyors recorded and verified all necessary draft readings and calculations to ensure accurate cargo measurement, support commercial transactions, and maintain compliance with industry standards.

# PROJECTS CORNER

## Installation, Commissioning of Distribution panel.

Our team successfully completed the installation and commissioning of an electrical distribution panel, ensuring reliable and efficient power distribution for our valued client. The scope of work included panel installation, cable termination, system testing, functional

verification, and final energization. The project was executed in accordance with the highest safety and quality standards, achieving timely completion and full compliance with technical specifications.

## IBC tanks supply to vessels

The supply of IBC tanks to the vessel was completed with careful planning and supervision. Our team ensured the tanks were securely handled, inspected, and delivered on schedule while maintaining compliance with safety and operational requirements

## Offshore Calculation (Loadout Plans)

Our engineering team successfully completed an offshore loadout calculation and planning project for the transportation of a cargo barge. The work involved detailed stability assessments, ballast planning, structural checks, and the preparation of a comprehensive loadout preparation of a comprehensive loadout methodology to ensure the safe movement of the structure from the quayside to the barge. Through careful engineering analysis and planning, the project was delivered efficiently while meeting all operational and safety requirements. This achievement reflects CHM Global's continued commitment to providing dependable marine and offshore engineering solutions that support safe and successful project execution.

## Supply and installation of new AC unit in vessel

Our team successfully completed the supply and installation of a new air conditioning unit onboard an offshore vessel. The project included equipment supply, installation, electrical connections, testing, and commissioning to ensure reliable cooling performance. The work was carried out safely and efficiently, minimizing operational disruption while meeting all technical and safety requirements. For ensuring the safety of personnel during marine and offshore operations, specific Personal Protective Equipment (PPE) is required. These equipment helps minimize risks and protect workers from potential hazards.

## Calibration Of torque Wrench

Accurate torque is essential for the safety and reliability of every marine and offshore operation. We provides professional torque wrench calibration services to ensure your tools deliver precise, consistent performance while complying with recognized industry standards .Our expert calibration

engineers help maintain operational integrity, reduce risk, and support critical fastening applications.

## Ship & Spare Supplies (Ship Chandling)

Keeping vessels fully equipped for every voyage. We provides comprehensive ship chandling services, supplying high-quality provisions, deck and engine stores, safety equipment, spare parts, and maintenance materials. Our reliable and timely deliveries help vessels operate efficiently while meeting the highest maritime standards.

## Consumable items

The supply of essential consumable items was completed with careful handling and efficient logistics. All materials were inspected, securely packed, and delivered in accordance with project requirements, ensuring timely availability to support ongoing marine and offshore operations.

**CHM Global** ensures that all necessary PPE is used in accordance with safety standards, guaranteeing a safe working environment for all personnel during HSE attendance at marine operations.

- High-Visibility Clothing
- Gloves
- helmet
- Hearing Protection

# OFFSHORE OPERATIONS

July 2026 was a month of continued commitment for CHM Global's Offshore Operations team. Despite the challenging market conditions, we remained focused on delivering reliable engineering and marine support services with an unwavering commitment to safety, quality, and operational excellence.

Our team continued to provide technical expertise and dependable solutions, supporting our clients' offshore requirements while maintaining compliance with industry standards and best practices. We remain dedicated to delivering safe, efficient, and value-driven services as we navigate the evolving demands of the offshore sector.

# WORK ANNIVERSARY

## 8 YEARS ANNIVERSARY

Rajneesh Singh  
Regional Manager-Survey

Harrison Thomas  
Marine Surveyor

Mohammad Jana Alam  
Container Inspector

## 6 YEARS ANNIVERSARY

4 YEARS ANNIVERSARY

Suhail Siraj  
Marine Surveyor

Yogesh Kalimuthu  
Marine Supervisor

Abdul Khader  
Logistics

1 YEAR ANNIVERSARY

Vipin venugopal  
Marine Surveyor

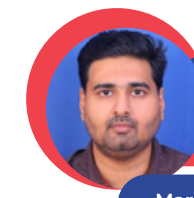

Kevin Henry Sequeira  
Deputy Manager- Survey

NEW JOINER SPOTLIGHT
